PROFESSIONAL SUMMARY

A proactive and product-focused 2nd-year Computer Science student with a strong foundation in full-stack MERN development and a demonstrated passion for applying Generative AI to solve real-world problems. Proven ability to architect, build, and deploy complex applications from scratch, including a sophisticated Retrieval-Augmented Generation (RAG) pipeline using LangChain.js. Eager to contribute to a challenging internship role in Software or AI Engineering, bringing a blend of modern web technologies and cutting-edge AI integration skills.

EDUCATION

BCA Honours degree in Software Product Engineering(similar to B.TECH)

@RV University, Bangalore

Expected Graduation: May 2028

TECHNICAL SKILLS

Category	Technologies
Languages	JavaScript (ES6+), Python, Java
Frontend	React.js, MUI (Material-UI), Framer Motion, Axios, HTML5, CSS3
Backend	Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Firebase Admin

AI/ML LangChain.js, Google Gemini & Embedding APIs, Vector Databases, RAG Pipelines

Tools & Platforms Git, GitHub, VS Code, Postman, Vercel, Render

PROJECTS

AcademiaGPT - An AI-Powered Personal Study Assistant

A full-stack MERN application that transforms static course materials into an interactive, conversational AI study partner.

- **Architected and deployed** a complete MERN stack application featuring a secure, JWT-based authentication system and a dedicated Node.js/Express.js backend to ensure private and protected user knowledge bases.
- **Engineered a sophisticated Retrieval-Augmented Generation (RAG) pipeline** from scratch using LangChain.js. This system processes uploaded PDFs, creates vector embeddings with the Google Gemini API, and enables users to have context-aware, interactive conversations with their documents.
- **Implemented dynamic AI-powered features**, including one-click document **summarization** and automated multiple-choice **quiz generation**, by crafting custom prompts and chaining them with the Gemini LLM.
- **Designed and built** a modern, responsive, and highly engaging user interface with MUI and Framer Motion, focusing on a seamless user experience with features like animated backgrounds, glassmorphism, and real-time feedback.
- **Managed the full end-to-end deployment cycle**, successfully hosting the React frontend on Vercel and the Node.js backend on Render, demonstrating a comprehensive understanding of modern CI/CD workflows.
